William Meurer, Go Green Solutions, expressed his appreciation for the Pasadena Police Department, and also expressed concerns regarding micro wave radiation, requesting that the City provide appropriate warnings for use of smart phones and other sources of non-ionizing radiation, and submitted written material

INFORMATION ITEMS

COLORADO STREET BRIDGE – SUICIDE MITIGATION ENHANCEMENTS PROJECT – PROGRESS REPORT

Ara Maloyan, Director of Public Works, provided a PowerPoint presentation summarizing the agenda item, and responded to questions.

Steve Line, Donald MacDonald Architects, continued the PowerPoint presentation summarizing the agenda item, and responded to questions.

The Chair asked staff to provide the Committee with an approximate cost estimate to enclose the bridge with a roof barrier concept, prior to consideration by the full City Council, stating that it is the duty of the City Council to review the various concepts, give full consideration as to the preservation of the bridge's historic aesthetics, and the need to approve the best concept that provides the greatest amount of protection possible to prevent suicide attempts from occurring.

Councilmember Madison expressed his concerns with the aesthetic character of the mesh concept, noted that the schedule seems ambitious given the public interest in this project, stated he would like to participate in future meetings with West Pasadena Residents Association (WPRA), San Rafael Neighborhood, Desiderio Community, Arroyo Del Vista Community, and the Judges at the 9th Circuit, to ensure that all input is received and the City has conducted the appropriate amount of outreach and due diligence.

Vice Mayor Hampton asked several questions regarding the maintenance of the mesh material, the potential for birds flying into the material, and spoke on planting trees under the bridge, suggesting that tree planting may help prevent suicide attempts.

In response to the Vice Mayor's request, Ara Maloyan, Director of Public Works, stated he would provide an aerial map of the bridge.

The Mayor expressed his appreciation to staff for the steps taken in moving this project forward and their continued efforts to find a solution to this important issue, stated his opinion that there is no concept that is aesthetically pleasing, but feels hopeful with the hybrid concepts presented, and expressed his support for a full-scale mock-up to be constructed to adequately assess the options.

The Chair thanked staff and those involved in this process, echoed the Mayor's comments, and stated he looks forward to the continued leadership of the members of the Public Safety Committee on this issue and to educate the full City Council on the importance of this project.

On order of the Chair, and by consensus of the Committee, the information was received and filed.

COUNCIL COMMENTS

Vice Mayor Hampton conveyed concerns he received from residents regarding Police Officers approaching young men/high school age males requesting to take a photo of them, reports of increases in stop and frisk incidents without citations, violations for off-leash dogs that require attorney representation to contest the violation, and requested that staff provide information on the concerns noted above.

ADJOURNMENT

On the order of the Chair, the regular meeting of the Public Safety Committee was adjourned at 5:50 p.m.
